Personal protective equipment

Respiratory protection: Use respiratory protection unless adequate local exhaust ventilation is provided or exposure assessment demonstrates that exposures are within recommended exposure guidelines.

Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary.

Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable.

If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.

Hand protection

Remarks: Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions.

After contamination with product change the gloves immediately and dispose of them according to relevant national and local regulations.

Eye protection: Wear safety glasses with side shields (or goggles).

Skin and body protection: Wear suitable protective clothing.

Protective measures: Remove respiratory and skin/eye protection only after vapors have been cleared from the area.

Ensure that eye flushing systems and safety showers are located close to the working place.

Use personal protective equipment as required.

Hygiene measures: Handle in accordance with good industrial hygiene and safety practice.
